

OBJECTIVE

Seeking position as Front-End Developer in a company where I can utilize my skills and experience to create compelling websites that will increase overall online engagement and performance.

EXPERIENCE

Critical Mass

Front-End Developer, October 2014 - November 2015

Translated UI/UX design wireframes and visual comps into actual code to create visual elements for Java based web applications. Optimized web application code for maximum speed and scalability. Regularly communicated with project managers and senior team members on key technology issues on projects and provided solutions. Participated in building reusable code and libraries for future use. Assisted with creation of project documentation, including development requirements & style guides.

LocalLux

Front-End Developer/UX Designer, October 2013 - January 2015

Collaborated with company co-founder to redesign landing page and e-commerce site from visual designs and wireframes. Created low and high fidelity site mockups to flesh-out user experience ideas and alternatives. Regularly participated in website design reviews and user acceptance testing. Created and edited web banners and images for company e-commerce site.

NCSBN

Consultant, May 2014 - July 2014

Collaborated with team of UX Designers to redesign corporate website using OpenText CMS. Performed user testing of site content and worked with third party development team to resolve design and performance issues. Implemented html, scss, javascript and image content into OpenText content management system.

Alzheimer's Association

Front-End Developer, November 2013 - April 2014

Hand coded International hub master pages from visual designs using html 5 and CSS3. Created module web content and plugged them into Master Hub pages. Specified character language set for foreign country hub pages. Executed design and content edits during agile development cycle.
